EDUCATION

York University

Specialized Honours Bachelor of Science in Computer Science

Toronto, ON

Sep 2020- Dec 2025

EXPERIENCE

Solutions Engineer Intern

Aug. 2025 – Nov. 2025

3E Robotic Technology

Toronto, ON

- Partnered cross-functionally with **clinical, operations, and commercial stakeholders** to scope customer requirements, supporting **solution validation and pre-sales discussions** for healthcare monitoring supporting **1,500+ patients**.
- Translated customer and operational needs into **end-to-end SaaS workflows**, designing scalable data pipelines using **Python** and **SQL** that reduced processing time by **35%**.
- Supported **product demonstrations, technical walkthroughs, and customer enablement** by delivering a **cross-platform Flutter application** optimized for non-technical users, driving a **43% increase in adoption**.
- Collaborated with product and engineering teams to incorporate **customer feedback** into platform improvements and operational response workflows.

Product Manager

Jun. 2023 – Dec. 2024

Mondelez International (Oreo, Cadbury, Toblerone, Maynards etc.)

Toronto, ON

- Led **problem discovery, solution scoping, and end-to-end product delivery** for a digital maintenance platform, translating user and business needs into shipped features that delivered **dilized prod**
- Partnered with operations, engineering, and leadership to **define product requirements, prioritize features, and articulate ROI**, enabling executive alignment and facility-wide rollout.
- Owned **user onboarding and enablement strategy** for **400+ users**, driving product adoption, retention, and long-term usage across multiple facilities.
- Acted as the **primary liaison between users and engineering**, gathering feedback, managing tradeoffs, and translating insights into **roadmap enhancements and iterative product improvements**.

Technical Solutions Analyst

Jan. 2023 – Jun. 2023

MacEwan University

Remote

- Delivered a secure, scalable assessment platform supporting **10,000+ students and 1,000+ faculty**, aligning technical design with academic and compliance requirements.
- Refactored backend with asynchronous execution, reducing response time by **35%**, improving peak-load throughput.
- Implemented RESTful API endpoints and a secure JWT/OAuth authentication system, reducing unauthorized access risks by 90% and ensuring protected data access for **1,000+ faculty and 10,000+ students**.

Technical Solutions Engineer

Jan. 2020 – Jun. 2022

GTA Auctions

Mississauga, On

- Conducted requirements discovery with business users, identifying workflow pain points and translating them into system redesigns that improved operational efficiency by **29%**.
- Built a **python + SQL** inventory-tracking system, eliminating manual entry and reducing cataloging errors by 80%+.
- Developed an automated employee-hours and payroll-tracking system, eliminating manual calculation errors and reducing processing time by over **60%**.

PROJECTS

Technical Solutions & SaaS Implementations | *Python, JavaScript, FastAPI, SupaBase, SQL, Stripe*

- Partnered directly with business users and leadership to **scope solutions, support internal product demos, and validate workflows**, improving operational efficiency by **29%**.
- Delivered **custom SaaS-style tools** and automation systems using **python and SQL**, reducing errors by **80%+** and increasing user adoption.
- Built **CI/CD pipelines** using GitHub Actions to automate testing and deployment to cloud environments.

SKILLS

Languages: Python, JavaScript, TypeScript, SQL, XML

Frameworks: React, FastAPI, Node.js, Django, Flutter

Consulting & Pre-Sales: Requirements Discovery, Solution Scoping, Stakeholder Management, Cross-Functional Collaboration

Technical Foundations: API Design & Integration, Data Modeling, SQL, Authentication & Access Control.

Platforms & Tools: SAP, NetSuite, Salesforce, HubSpot ERP, PostgreSQL, AWS, Stripe, Tableau, Azure, Microsoft Office Suite

SaaS & Implementation: System Integration, Workflow Automation, Configuration & Deployment, User Onboarding.

AI Tools: Claude, Cursor, ChatGpt, n8n, Google Gemini, GitHub Co-pilot, Power BI
